

# FIELD system

## FIELD system Daily Check

### DESCRIPTION

FIELD system Daily Check is an application that allows an easy and reliable execution and recording of daily checks including instructions on mobile devices.

### KEY BENEFITS

- Improved machine and process reliability by regular and high quality checks
- Improved control on machines condition by remote supervisor
- Improved processes and checking due to daily logs being recorded
- Any production device can be included in the daily check process

### KEY FEATURES

- Record and display the history of daily check of equipment
- Check process will be performed on mobile device
- Check items will be displayed by reading the QR code on equipment
- Records can be input by selecting, filing-in or photo-taking
- The check results can be confirmed from remote PC

### APP PREVIEW

The screenshot shows the 'FIELD system Daily Check' application interface. On the left is a 'Menu' with options: 'Checked Result', 'Edit Place', and 'Edit Layer'. The main area displays a 'Checked Result' section with filters for 'Year/month' (September 2019), 'Fab' (FANUC Italia), 'area' (Show Room), and 'Target'. Below the filters is a table showing the check history for various equipment items.

Target	Item	Interval	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
